**1** Slightly unusual logo for getting extra attention seconds.  
Also establishes the color scheme of the web app.

**2** Ample whitespace: provides negative space and emphasis to main content of the application.

**3** Differently colored and big buttons: to create movement and get attention.

**4** Use of colors for showing urgency or expiry and graphical arrangement of information: Intuitive, quick, and pleasing to the eyes.

**5** Emphasis through Typography: Share count encourages more visitors.

**604 SHARES**

**Examashboard: Web App**

**1** De-cluttered Tool-bar

**2** Tree Widget with Drag Drop, fold-ability, colored nodes: Simple, Intuitive and provides highly display density for a given classification of data. Color annotation also enhances the usability.

**3** Be-Youtube

**4** Important things need to be at 1/3rd intervals in the video.

**5** A big button for the most frequent operation.

**Combo Box Widget with instant suggestion :** Quickly Reachable (Left), provides visual feedback before selecting, Icons on left for indicating state of file.

**Simple text widget without tool-bars, buttons:** provides distraction free note taking

**Snippets : Windows App**
